VERIFY SUBSCRIPTIONS

Adobe API Manager – Subscriptions for publishers

01

Let's verify the subscriptions to a set of services. We need to switch over to the publisher role in the API Manager to perform this action. If you do not have publisher rights, you will not be permitted to view this.

02

In the top-right of your screen in the API Manager, switch to the Publisher user. Again, you may not have access to this option.
