

01

Next we will use the “Add UserStore” option to create a new UserStore.

02

There are three options available when creating UserStores. Database Table Connector, Java Script Connector and LDAP Connector. They all their strengths and weaknesses.

### Javascript Connector

```
1
2
3  var pool = require("http", {});
4  var log = require("log", {});
5  var userPropName = "customerid";
6  var incomingUserCustomerID = "id";
7  var authURL = "https://";
8  var httpResponse = require("response", {});
9  var httpRequest = require("request", {});
10
11
12  function auth(username, password) {
13
14      var reqBody = "username=" + username + "&password=" + password;
15      try {
16          var response = pool.post(authURL)
17              .header("accept", "application/json")
18              .header("Content-Type", "application/x-www-form-urlencoded")
19              .body(reqBody).asString();
20      } catch (e) {
21      }
```
