

# SOAP API CREATION

Adobe API Manager – SOAP API – Create

01

You will see a similar option as the REST. In this case you will simply paste in the WSDL and click on the Fetch button to begin the process.

WSDL URL

<https://www.dataaccess.com/webservicesserver/NumberConversion.wso?wsdl>

Fetch

02

The API Manager will complete the ingestion of the WSDL and generate SOAP based services for consumption.
