

MANUAL CREATION

Adobe API Manager – Import REST from ColdFusion – API Manager Configurations

01

We will logout of the API Manager administrative section and return to the portal of the API Manager. Return to the url below and login if you are not authenticated.

localhost:9000/portal/#/login.html

02

Now when you import “REST API From ColdFusion” you should see the following automatic mapping to the registered ColdFusion REST Services. We will use the Import button to begin the process.

Import REST API From ColdFusion

Import REST API From ColdFusion

To import REST APIs from Coldfusion, please login to ColdFusion administrator page and enable "Allow REST Discovery" checkbox under Settings tab of Server Settings.

▼ localhost:8500
