

# COMPONENT ATTRIBUTES AND CONFIGS

Configuring REST services in ColdFusion

```
<cfcomponent rest="true" restpath="customers" Name="Customers">
```

```
component rest="true" restpath="/customers" Name="Customers">{
```

A

## ATTRIBUTES 01

When creating a Component (CFC) specify the cfcomponent tag to one of the following: restPath or rest.

B

## CONFIGS 02

The rest attribute needs to be set to true for services to be configured.

C

## SYNTAX 03

Both tag and script syntax options are available. Both will be provided for examples.
