

SOAP TO REST CREATION

Adobe API Manager – SOAP to REST – Create

01

Although SOAP still finds a home in many organizations, REST services are generally preferred. You can easily convert any SOAP WSDL to REST services by utilizing the Adobe API Manager. This is a unique and powerful option. Use the “Create REST API From SOAP” option to begin the ingestion.

A

02

We will use the sample SOAP WSDL to the right to begin this process.

B

Sample SOAP WSDL
