

URL STRUCTURE

Adobe API Manager – Admin and Portal

01

Administration URL

localhost:9000/admin/login.html

A

The administration url will allow you to make configuration changes to the platform via the UI. You do have the capability to make changes through configs and rest API calls. More on that to come.

02

PORTAL URL

localhost:9000/portal/#/login.html

B

The portal endpoint will allow you to create, manage and monitor your endpoints. There are many features available. There is a critical difference between the two endpoints. It is important to understand what they do.
