

SAMPLE CODE

Configuring REST services in ColdFusion – GET Methods

SAMPLE CODE – GET Methods – Script Based

```
//GET Request to return customers
function get () access="remote" returntype="array" produces="application/json" httpmethod="GET" {
    var customers = [];
    customers[1] = "Brian";
    customers[2] = "Caroline";
    customers[3] = "Noah";
    customers[4] = "Elijah";
    customers[5] = "Maverick";
    return customers;
}
```
