

# SAMPLE CODE

Configuring REST services in ColdFusion – Samples

## SAMPLE CODE 01

To illustrate some sample code, we will continue with the samples we have already provided. In the webservices directory that we mapped in ColdFusion earlier, we will create a Component (CFC) called Customers.

We will also create a CustomersScriptBased Component (CFC) to illustrate the same process but without tags. If you prefer to write only in script those samples will be provided as well.
