SECURITY

Adobe API Manager – User Stores

01

Moving on from API Keys we will explore some of the other security section items that you can implement to protect your services. First, we need to set up our UserStore to do so. Login to the administration portal to begin the process.

localhost:9000/admin/login.html

02

Once you are loggedin use the Security menu and drill down to the UserStore and Users options under Security.
