# RATE LIMITING AND THROTTLING

Adobe API Manager – API key and publishing

01

In order to exercise the rate limits and throttle controls you have created you will need to select some form of security to protect your services.

02

At a minimum, an API Key option must be selected. Although this is grouped under security, this option should not be used a security measure to protect your services. You also have the option to forward the api key to your endpoint.
