RATE LIMITING AND THROTTLING

Adobe API Manager – Rate and throttle

01

You have various options when configuring SLA's. Creating these custom SLA's allow to you control different usage parameters for your consumers. Admin definitions become global and will be available to your publishers.

02

There are hard and soft limits. These limits allow for hard stops on rate limiting and throttling. They also allow for soft notifications and SLA violations. Rate limiting protects access while throttling controls traffic.

Add New SLA

SLA Name*	DemoCustom
